1. Welcome message from your Module Leader

Welcome to COMP1913: International Data Analytics.

In today's globally interconnected environment, data is a critical asset for organisations operating across borders, markets and cultures. Decisions are increasingly shaped by data drawn from diverse international sources and interpreted within varied economic, cultural and organisational contexts. This module is designed to help you understand and work effectively within this international data landscape.

Throughout the module, you will explore a comprehensive range of topics in statistics, addressing both straightforward and more complex real-world problems with an international dimension. You will develop the analytical skills required to effectively summarise, analyse, and present data to support decision-making across diverse markets and stakeholder environments. Guidance and support will be provided in the use of appropriate computing software applications to enhance your ability to make informed decisions using data.

The team has worked hard to create a curriculum designed to combine theoretical foundations with practical application, to support all our learners regardless of data background. Learning activities will help you build confidence and capability progressively, ensuring that you are well prepared to engage with the module content and assessments regardless of your starting level.

This handbook provides essential information about the module, including its aims and learning outcomes, the schedule of teaching and learning activities, assessment tasks, recommended resources and any additional materials you may need. Please read it carefully at the start of term to ensure you are aware of key expectations and important dates.

I hope you find the module engaging and valuable to your professional development and I wish you every success as you begin COMP1913 International Data Analytics!

Module Leader,
Rhonda A. Best
r.a.best@greenwich.ac.uk

2. Key contacts (academic queries)

The list below provides contact details of the full module team.

Lecturer: Dr. Brian Seow
Location: London School of Business & Finance Singapore Campus
Email: bseow@lsbf.edu.sg
Office hours: Appointments available by request.

Lecturer: Mr. Zhou Zhihao
Location: London School of Business & Finance Singapore Campus
Email: zzhihao@lsbf.edu.sg
Office hours: Appointments available by request.

Programme Executive: Ms Jocelyn Tan
Location: London School of Business & Finance Singapore Campus
Email: yfjtan@lsbf.edu.sg
Tel: + 65 65807579
Office hours: 9-6pm

Academic Manager: Mr. Keith Soh
Location: London School of Business & Finance Singapore Campus
Email: ksoh@lsbf.edu.sg
Office hours: 9-6pm

Your module lecturer will be your first point of contact.

3. Module details and learning outcomes

Host Faculty: Greenwich Business School
Host School: Executive Business Centre
Number of Credits: 15
Term(s) of delivery: Term 1, 2, 3
Site(s) of delivery: Greenwich

Aims

The concepts of statistics and data analysis tools are introduced in this course within a business and organisational framework. It seeks to give students the analytical tools and skills to effectively summarise and present data supporting decision-making activities. Students will be facilitated and assisted in this work using the proper computing software applications. Through their study of this course, students will be equipped to use statistical and mathematics concepts to address straightforward yet practical problems. The purpose of this subject is to acquaint students with the ideas, vocabulary, methods, and tools of big data analytics.

Learning Outcomes

1. Develop decision-making ability in the fast-paced world by understanding data driven models.
2. Apply basic quantitative/qualitative methods in the analysis of problems arising in a business management context.
3. Use and evaluate quantitative techniques to carry out an investigation into a business problem put in form of a case study.
4. Identify appropriate computer packages to support completion of the data, decision making tasks.
5. Critically evaluate and execute research on a case study to write an effective report.

4. Employability

You can find out more about the Greenwich Employability Passport at:
Greenwich Employability Passport for students

Information about the Career Centre is available at:
Employability and Careers | University of Greenwich.

Job Market Skills
Analytical Skills • Understand key data to make informed business decisions. • Identify patterns and trends to help guide decision-making. • Assess the relevance of data to real-world business challenges. • Communicate data insights clearly to stakeholders for actionable outcomes. • Evaluate the reliability and quality of data used in analysis. **Organisational and Planning Skills** • Plan and organise tasks effectively to manage data projects. • Prioritise tasks to meet deadlines when handling data analysis. • Work with teams to ensure data collection and analysis processes are well-coordinated. • Manage time efficiently when working with large datasets and tight deadlines. **Critical and Reflective Thinking** • Reflect on the effectiveness of your data analysis and decision-making. • Evaluate different approaches to data analysis and their relevance to business problems. • Identify potential biases in data and assess their impact on decision-making. • Continuously improve analytical skills by learning from past experiences. **An Awareness of Ethical Understanding and Reasoning** • Understand the ethical implications of using data, especially in decision-making. • Ensure data privacy and protection in compliance with regulations. • Evaluate the impact of data use on individuals and society. • Make responsible decisions when using AI and other data tools in business contexts. **International Awareness** • Understand global data trends and how they affect business operations worldwide. • Recognise cultural differences in data interpretation and its implications for business decisions. • Stay informed about international data regulations like GDPR and apply them in practice. • Analyse data in the context of global business environments to identify opportunities and risks.

5. Schedule of teaching and learning activities

	Activity	Description
Week 1	Online Lecture	**Introduction to International Data Analytics**
	Tutorial	Activities to assess your starting point
Week 2	Online Lecture	**Data-driven decisions and cognitive biases (Guest Lecture)**
	Tutorial	Activities that highlight how cognitive biases influence our decision making
Week 3	Online Lecture	**Critical Thinking and Why Numbers Can Lie (Guest Lecture)**
	Tutorial	Activities to improve critical thinking skills
Week 4	Online Lecture	**Evaluating Reports**
	Tutorial	Activities to support report interpretation for decision making Effective report writing support
Week 5	Online Lecture	**Visualizing Data: Simple descriptive statistics**
	Tutorial	Activities that apply descriptive statistics Effective report writing support
Week 6	Online Lecture	**Analysing Surveys results to test hypotheses**
	Tutorial	Activities that apply hypotheses Effective report writing support
Week 7	Online Lecture	**Simple regression modelling**
	Tutorial	Activities that apply simple regression modelling Effective report writing support
Week 8	Online Lecture	**Time series Analysis**
	Tutorial	Activities that apply time series Effective report writing support
Week 9	Online Lecture	**Emerging Trends in International Data Analytics**
	Tutorial	An activity that examines emerging trends

		Activities that provide presentation support
Week 10	Online Lecture	**Simple Mathematical Calculations**
	Tutorial	An activity to apply simple mathematics Activities that provide presentation support
Week 11	Online Lecture	**No lecture**
	Tutorial	Presentations
Week 12	Online Lecture	**No lecture**
	Tutorial	Presentations

6. Assessments

Method of assessment	Outcomes assessed	Deadline	Weighting %	Pass mark	Word length (If applicable)	Outline details
Report	LO3, LO4, LO5	4 Dec 2026	50%	50%	2000 words (excluding references)	Students will submit an individual report that critically evaluates the publication provided
Group Presentation	LO1, LO2	27 Nov 2026	50%	50%	15-20 slides	Students will present the PowerPoint slides as group and answer individual questions

*The weighting refers to the proportion of the overall module result that each assessment task accounts for.

Assessment 1: Report

In today's data-driven business environment, the ability to critically evaluate reports and data visualisations is more important than ever. As an experienced businessperson, you will frequently encounter reports that inform strategic decisions, shape organisational policies, and influence stakeholder perceptions. However, not all reports are created equal. Some may lack essential information, while others may present data in a biased manner, leading to misguided conclusions and potentially harmful decisions. Critically evaluate the content (specifically the data visualisations) of the published work provided and write a 2000-word report.

Assessment 2: Group Presentation

Professionals in organisations of all sizes and from every sector use statistics to support their ideas. This assessment will evaluate your ability to understand and present a business case using visual data representations, while also developing decision-making skills and applying quantitative and qualitative methods to analyse business problems.

For details and assessment instructions please refer to the assessment briefs on Moodle.

To pass this module, students must achieve an overall mark of over **50%**.

The **Marking Rubric on Moodle** provides a detailed breakdown of marking criteria for the Essay. Please, read it carefully to understand what is expected of you.

For coursework, the marks and feedback will normally be provided to students within fifteen working days of the submission deadline. In exceptional circumstances, where there is a delay in providing feedback, you will be informed by the module leader.

If you do not pass a module at the first attempt, you will likely be eligible for a resit opportunity on the failed assessments. The Progression and Award Board (PAB) will decide whether you will be offered an opportunity to resit. Note that marks on resit assessments are capped at 50% unless Extenuating circumstances have been applied for and granted. For further details on resit assessments, please see the **Resit** section below.

External Examiner

The External Examiner for this module is:
Name: Ghulam Mujtaba
Institution: York St John University

Please note that the role of the External Examiner is to evaluate the overall standard of assessments on the module. They are unable to correspond with individual students about their work. If you need to discuss your marks or feedback, please contact the module leader.

Academic Misconduct

Plagiarism is a serious offence and is strictly prohibited. All essays submitted for this course will be checked by new advanced plagiarism detection software as well as other highly effective detection methods.

Coursework is marked on the understanding that it is the student's **own work** and that it has not, in whole or part, been presented elsewhere for assessment.

Severe consequences can result from plagiarism: you can fail the module and be expelled from the programme, with potential visa issue for foreign students. Where material has been used from other sources, this must be properly acknowledged in accordance with the University's Regulations regarding Academic Misconduct.

7. Assessment Resit:

Resit assessments	Deadline	Weighting out of 100%*	Maximum length	Marking type	Learning outcomes mapped to this assessment.
Report	Refer to Moodle	50%	2000 words (excluding references)	%	3, 4,5
Group Presentation Submission	Refer to Moodle	50%	15-20 slides	%	1, 2

8. Resource recommendations

The following are suggested readings for the module. Additional, more detailed reading recommendations will be provided for the module topics. You can check availability of the resources by using the search tool LibrarySearch at https://librarysearch.gre.ac.uk.

Author	Title	Publisher	ISBN
Francesco Marzoni	Data Analytics Made Easy: Analyse and present data to make informed decisions without writing any code	Packt Publishing Ltd	ISBN 978-1-80107-415-5
Viktor Mayer-Schönberger and Kenneth Cukier	Big Data: A Revolution That Will Transform How We Live, Work, and Think	Houghton Mifflin Harcourt	ISBN-9780544002937
Anil Maheshwari	Data Analytics Made Accessible	Business Expert Press Ltd.	ISBN-13-978-1-63157-120-6

9. Digital Student Centre (non-academic queries)

Our new Digital Student Centre is your space to find answers 24/7 to your questions about student life, helping you get the support you need when you need it.

AskUoG provides you with hundreds of up-to-date articles covering topics such as student engagement, student finance, academic and personal conduct, accommodation, visa and international student advice, disability, mental health and wellbeing support.

For academic queries, always contact the staff who work with you on your academic programme - your programme leader, module leader or personal tutor.

10. Changes to the module

At the University of Greenwich, we value feedback from students, External Examiners and other stakeholders and we use this information to help us improve our provision. Important note: The University of Greenwich will do all that it reasonably can to deliver the module and support your learning as specified in our handbooks and other information provided. However, under some circumstances, changes may have to be made.

This may include modifications to the:

- content and syllabus of modules, including in relation to placements
- timetable, location and number of classes
- content or method of delivery of your module
- timing and method of assessments.

This might be because of, for example:

- academic changes within subject areas
- the unanticipated departure or absence of members of university staff
- where the numbers expected on a module are so low that it is not possible to deliver an appropriate quality of education for students enrolled on it
- industrial action by university staff or third parties
- the acts of any government or local authority
- acts of terrorism.

In these circumstances, the university will take all reasonable steps to minimise disruption by making reasonable modifications. However, to the full extent that it is possible under the general law, the university excludes liability for any loss and/or damage suffered by any applicant or student due to these circumstances.
